

Web Technology Assignment Report

Building Damage Detection Website

Group Members and Work Distribution

Sr. No.	Member Name	Work Done
1	Aditee Shandilya	Combined all webpages together. Worked on website designing using CSS and improved the UI.
2	Srishti	Created the homepage and building navigation pages.
3	Samrudhi Singh	Reconstructed working tree, rewrote file and image paths and hosted webpages on github
4	Aarya Nenawatee	Added Ground Floor and First Floor cracked tile data with images.
5	Nehansh	Collected images of cracked tiles and arranged project folders/files.
6	Sreshtha Ghosh	Added Third Floor and General Area webpages with inspection details.
7	Aarshia Chauhan	Performed testing, checked webpage links and helped in report preparation. Worked on website designing using CSS and improved the UI.

About the Project

This project is a web-based system developed using **HTML and CSS** to display cracked tile locations in different areas of the college campus.

The website contains:

- Building-wise navigation
- Floor-wise inspection pages
- Images of damaged tiles
- Modern webpage design
- Maintenance status display

Technologies Used

- HTML
- CSS

- git Programming

Objective of the Project

The main objective of this project is to create a simple and user-friendly website for identifying and reporting cracked tiles in different college areas for maintenance purposes.

Conclusion

By doing this project, we learned:

- Basic webpage designing
- Linking multiple webpages
- Styling using CSS
- Team coordination
- Creating a responsive and attractive UI
- Deploying changes
- Maintaining Version control

The project helped us understand practical implementation of web technologies in real-world applications.
